# \*SCIENCE MODULE

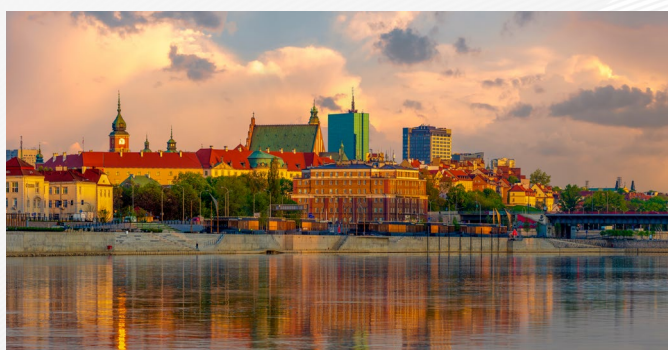

## - 5 PATHS TO CHOOSE FROM

Module/Path	Soft skills training	Sustainability camp	Introduction to small-medium enterprise management	Introduction to Information Technology, Cybersecurity, and Cloud Computing	Data Science and AI for Beginners
	<p>Do you want to improve your soft skills? Join us for a summer camp where you will upgrade your negotiation, communication, conflict management skills and learn how to build a personal brand.</p>	<p>Want to learn more about sustainability? Join summer school that will provide you with a comprehensive introduction to sustainability, green business, and climate change. Moreover, you will have an opportunity to test acquired knowledge by playing a simulation game designed to learn sustainability.</p>	<p>You have a business idea, but don't know how to get started. Join us for a summer school during which you will learn the basics on how to build your own business. You will also play a simulation game that will give you a real-life business experience.</p>	<p>Join our summer workshop to get a solid grounding in IT basics, covering everything from hardware and software to networking. Then, dive into key topics like cybersecurity and cloud computing. Engage directly with basic cybersecurity principles and the fundamentals of cloud computing, progressing to advanced concepts such as cloud security, data protection, and encryption. The program culminates with a practical project where you'll design a secure cloud environment.</p>	<p>Join us this summer to learn how data science is making an impact across various sectors, understand the basics of data analysis, machine learning, and the influence of AI in everyday life. Our workshops offer a mix of theory and hands-on learning. You'll explore data visualization, discuss ethical implications of AI, and undertake a project to create a simple AI or machine learning model.</p>
1	Soft skills – a key to professional and personal success	Introduction to sustainable development	Introduction to business – 2 hrs	Basics of Information Technology	Introduction to Data Science

2	How to build strong teams?	Re-use, reduce, recycle – introduction to circular economy	Introduction to microeconomy	Introduction to Cybersecurity	Basics of Data Analysis
3	How to make a good presentation?	Can business be more ethical and greener? ESG in business	Soft skills in business	Cloud Computing Fundamentals	Introduction to Machine Learning
4	How to build strong personal brand?	How to use human creativity to tackle environmental crisis? Introduction to green innovations	Introduction to business plan preparation	Cybersecurity in the Cloud	Data Visualization Techniques
5	Conflict resolution	Fishbank game – part 1	Business simulation games – part 1	Data Protection, Privacy, and Compliance	Ethics in AI and Data Science
6	How to become a good leader?	Fishbank game – part 2	Business simulation games – part 2	Project: Designing a Secure Cloud Environment	Project: Simple AI/ML Model
