## **CORE MODULE DESCRIPTORS – 2'nd Semester**

<b>1. Mo</b>	dule Title		Introduction to		2. Module Co	de		
			Macroeconomics					
3. Academic			2022-2023					
Year,	Semester,		Spring semester,					
Modu	le Status		Full-time					
4. Ain	ns and	The air	in of this course is to introduce students to macroeconomic theory					
Learn	ing	princip	les with the practical	cal use of various macroeconomic models.				
Outco	omes	By the	end of the course, stu	and of the course, students will be able to:				
		1. 1	Interpret and measure	e main macroeconomic categories;				
		2. 1	dentify main sectors	n sectors of an economy and flows between them;				
		3. 1	Measure the economic	feasure the economic flows [national/social accounting];				
4.		4. 1	Illustrate what an economic model is and how to build and handle one;					
		5. 1	Employ the basics of comparative statics analysis and use simple					
		1	mathematics for multiplier analysis;					
6.		6. 1	Distinguish between short and long run analyses and models;					
		7. 1	Interpret the determinants of output in the long run;					
8.		8. 1	Understand the basic features of a labour market and understand the					
		1	measures of un/employment;					
9.		9. 1	Explain basic categories in the area of money and banking, both					
		1	historically and at present;					
10.		10. 4	Analyse the basics of short run fluctuations: understand and employ					
		5	static/deterministic versions of the simple Keynesian [algebra and graphic					
		6	exposition] and the IS-LM model [mostly graphical exposition and					
an		analysis] – both in a closed economy version);						
11.		11. ]	Describe and know how to measure the effects of basic types of					
r		macroeconomic policies in the short run;						
12. Relate th			Relate the IS-LM anal	nalysis to the AD-AS framework.
